1. **Introduction**
2. **Methodology**
3. **Results**
4. **Discussion**
5. **Conclusion**

The following table provides a summary of the key findings and conclusions from the study. The data is presented in a clear and concise manner, allowing for easy comparison and analysis of the results.

Parameter	Value	Unit
Mean Value	12.5	mm
Standard Deviation	2.3	mm
Minimum Value	8.5	mm
Maximum Value	16.5	mm

The results of the study indicate that the mean value is significantly higher than the minimum value, suggesting a positive correlation between the variables being measured. The standard deviation is relatively low, indicating that the data points are closely clustered around the mean.

Variable	Value	Unit
Variable 1	10.2	mm
Variable 2	11.8	mm
Variable 3	13.5	mm
Variable 4	15.1	mm
Variable 5	16.8	mm

 Growth rate is the annual percentage change in GDP.

This diagram illustrates the components of a mechanical system. The central shaft is supported by a base and is connected to a gear or pulley at the top. The horizontal component on the left is likely a handle or a lever, and the rectangular block on the right is a housing or a support structure. The shaft passes through the block, and the horizontal bar below it provides additional support.

The diagram shows the following parts:

Part Number	Description	Quantity	Material	Notes
1	Shaft	1	Steel	
2	Gear/Pulley	1	Steel	
3	Handle/Lever	1	Aluminum	
4	Rectangular Block	1	Steel	
5	Horizontal Bar	1	Steel
