i održivi razvoj**

**SEKTOR ZA IZGRADNJU I
LEGALIZACIJU OBJEKATA**

Broj: D 08-332/20-547
Podgorica, 02.jul 2020.godine

na osnovu člana 74. Zakona o planiranju prostora i izgradnji objekata ("Sl.list CG" br.64/17), Uredbe o povjeravanju dijela poslova Ministarstva održivog razvoja i turizma jedinicama lokalne samouprave ("Službeni list Crne Gore" br.68/17 od 20.10.2017.godine), Detaljnog urbanističkog plana "Momišići B" usvojen od strane SO Podgorice Odlukom 02- 030 / 18 - 1502 od 27.12.2018. godine, evidentiran u Registru planske dokumentacije Ministarstva održivog razvoja i turizma na dan 02.jul 2020.godine, i podnijetog zahtjeva broj D 08-332/20 - 547.

IZDAJE URBANISTIČKO TEHNIČKE USLOVE
za izradu tehničke dokumentacije

CRNA GORA
GLAVNI GRAD PODGORICA
Sekretarijat za planiranje
prostora i održivi razvoj
Broj: D 08-332/20 - 547
Podgorica, 02. jul 2020. godine

DUP "Momišići B"
Urbanistička parcela broj UP b 244

URBANISTIČKO - TEHNIČKI USLOVI

za urbanističku parcelu broj UP b244,
Detaljnog urbanističkog plana "Momišići B"

PODNOŠILAC ZAHTJEVA:

Goran Knežević

POSTOJEĆE STANJE:

Prema grafičkim prilogima plana katastarska parcela broj 1628 KO:Tološi je izgrađena, uknjižena je porodična stambena zgrada, površine pod objektom 113m², spretnosti 1P.

U prilogu ovih urbanističko tehničkih uslova su i list nepokretnosti i kopija plana od 16.06.2020. godine.

Katastarska parcela broj 1628 KO:Tološi nalazi se u zahvatu DUP-a "Momišići B".

PLANIRANO STANJE:

DUP-om "Momišići B" formirana je urbanistička parcela broj **UP b244** koja prema analitičkim podacima površine je 697 m² i planirana za dokompletiranje.

Građevinska linija se utvrđuje u odnosu na regulacionu liniju i osovину saobraćajnice, a predstavlja liniju do koje je moguća gradnja.

Parcelaciju treba sprovesti prema grafičkom prilogu i analitičko – geodetskim .

USLOVI ZA PARCELACIJU

Pojedinačni uslovi su dati za svaku parcelu sa urbanističkim pokazateljima u tabelama.

Predloženi grafički plan parcelacije predstavlja definitivno rješenje na osnovu kojeg će se sprovesti planski dokument. Ukoliko na postojećim granicama parcela dođe do neslaganja između zvaničnog katastra i plana, mjerodavan je postojeći katastar.

Ukoliko vlasnici ne žele da ulaze u nove investicije i grade nove objekte planirane umjesto postojećih na istoj parceli, nisu obavezni da to rade.

Namjena, regulacija i nivelacija, gabariti i oblikovanje prostora:

DUP-om "Momišići B" na urbanističkoj parceli **UPb44**, planirana namjena površina je SMG stanovanje male gustine.

Postojeći objekat može se zadržati u postojećem gabaritu i spratnosti.

Postojeći objekti se mogu dograditi i nadograditi pod sledećim uslovima:

USLOVI ZA DOGRADNJU I NADOGRADNJU POSTOJEĆIH OBJEKATA

Uslovi iz ovog poglavlja se prevashodno odnose na postojeće stambene objekte. Ovi objekti se mogu dograditi i nadograditi pod uslovom da se:

- poštuju maksimalni planski parametri za datu urbanističku parcelu
- poštuju planirana horizontalna i vertikalna građevinska regulacija
- poštuju kompozicioni i oblikovni uslovi koji se odnose na zonu mješovite namjene
- poštuju propisano rastojanje objekta od susjedne urbanističke parcele u zoni stanovanja male gustine (4 metra)

USLOVI ZA OBJEKTE STANOVANJA MALE GUSTINE

U slučaju izgradnje planiranog objekta umjesto starog, moraju se poštovati građevinske linije na grafičkom prilogu.

Indeks zauzetosti u zoni stanovanja male gustine definisan je u zavisnosti od veličine parcele. Indeks progresivno opada sa rastom površine parcele da bi se spriječila izgradnja velikih objekata kolektivnog stanovanja u zoni stanovanja male gustine. Na osnovu statističke analize postojećeg građenog fonda i pripadajućih parcela formulisan je set opštih pravila za definisanje urbanističkih parametara:

Površina	zauzetost	P. osnove	izgrađenost
do 200	0.45	90	1.35
do 350	0.4	140	1.2
do 600	0.35	210	1.05
do 900	0.3	270	0.9
do 1200	0.25	300	0.75

Napomena: navedena formulacija urbanističkih parametara u odnosu na površinu urbanističke parcele predstavlja generalno plansko opredjeljenje i pokušaj da se raspon vrijednosti parametara postavi dovoljno fleksibilno da bi se primijenio na što veći broj stvarnih slučajeva. Na nivou plana kao cjeline predložena pravila su poslužila da se definišu parametri za integraciju postojećih i izgradnju novih objekata u zoni stanovanja male gustine. Ipak, u pojedinim slučajevima je došlo i do odstupanja. To se prvenstveno odnosi na one slučajeve u kojima površina parcele ima granične vrijednosti, ali i na slučajeve u kojima je priložena važeća građevinska dozvola izdata na osnovu prethodnog plana, kao i na objekte kojima u procesu legalizacije "nedostaje" nekoliko procenata BGP. Uopšte, činjenica da je prostor zahvata plana već izgrađen na gornjoj granici stanovanja male gustine, kao i da je veliki broj objekata građen sa prekoračenjem ili bez dozvole, uslovio je nemogućnost apsolutne primjene navedenih pravila koja bi bila moguća u slučaju planiranja neizgrađenog područja.

Na svim parcelama namijenjenim stanovanju male gustine, prema Pravilniku se mogu predvidjeti objekti koji ne ometaju osnovnu namjenu i koje služe svakodnevnim potrebama

stanovnika područja, i to:

- trgovina i ugostiteljski objekti, smještaj turista, poslovni sadržaji koji su smješteni u prizemljima i mezaninima stambenih objekata;
- objekti za upravu, kulturu, školstvo, zdravstvenu i socijalnu zaštitu, sport i rekreaciju i vjerski objekti koji služe svakodnevnim potrebama stanovnika područja;
- objekti i mreže infrastrukture;

- parkinzi i garaže za smještaj vozila korisnika (stanara i zaposlenih) i posjetilaca;

Za izgradnju objekata stanovanja male gustine (zone B, C i D) važe slijedeće smjernice:

- Preporučuje se izgradnja slobodnostojećih objekata manjih gabarita, utopljenih u zelenilo
- U slučaju izgradnje dvojnih objekata obavezno je pribavljanje zajedničke saglasnosti glavnog gradskog arhitekta na kompletan projekat za obje urbanističke parcele
- Zbog očuvanja rezidencijalnog karaktera naselja, **nije dozvoljena izgradnja privrednih i poslovnih objekata u funkciji proizvodnje, prerade, skladišta, stovarišta ili veleprodaje.**
- U jednom stambenom objektu može biti organizovano maksimalno 4 stambene jedinice
- Na većim parcelama moguće je planirane kapacitete opodijeliti na više objekata, tako da se ne prekorači ukupna planirana zauzetost, izgrađenost i BGP
- Na parceli se mogu graditi pomoćni objekti koji su u funkciji korišćenja stambenog objekta (garaža, ostava i sl), a čiji kapacitet ulazi u obračun ukupnih kapaciteta na parceli.
- Moguća je izgradnja **jedne podrumске ili suterenske etaže** koja se koristi **isključivo za garažiranje** i ne ulazi u obračun BGP.
- Podrum je podzemna etaža čiji vertikalni gabarit ne smije nadvisiti kotu terena, trotoara više od 1.00 m. Ukoliko se radi o denivelisanom terenu, relevantnom kotom terena smatra se najniža kota konačno uređenog i nivelisanog terena oko objekta. Horizontalni gabariti podruma definisani su građevinskom linijom ispod zemlje (GL 0) i ne mogu ni u kom slučaju preći regulacionu liniju. Ukupna površina podruma ne može biti veća od 80% površine urbanističke parcele, i to samo ako je zadovoljen minimalni procenat ozelenjenosti na parceli.
- Suterena je nadzemna etaža kod koje se dio vertikalnog gabarita nalazi iznad kote konačno nivelisanog terena oko objekta i čiji su horizontalni gabariti definisani građevinskom linijom GL. Suterena može biti na ravnom i na denivelisanom terenu. Kod suterena na ravnom terenu vertikalni gabarit ne može nadvisiti kotu terena više od 1.00 m konačno nivelisanog i uređenog terena oko objekta. Suterena na denivelisanom terenu je sa tri strane ugrađen u teren, s tim što se kota poda suterena na jednoj strani objekta poklapa sa kotom terena ili odstupa od kote terena maksimalno 1.00 m.
- Minimalna udaljenost svakog dijela objekta od granice parcele je 2 m. Ukoliko je rastojanje objekta od bočnog susjednog objekta veće od 5m, na bočnim fasadama objekta dozvoljeno otvaranje prozora samo pomoćnih prostorija, a ukoliko je rastojanje objekta od bočnog susjednog objekta veće od 7 m, na bočnim fasadama objekta dozvoljeno je otvaranje prozora stambenih prostorija
- Planom definisana minimalna rastojanja od granice parcele i susjednog objekta mogu biti i manja uz saglasnost vlasnika susjedne parcele, ali ne manja od 1m.
- Kota poda prizemlja može biti za stambene prostore od 0 do 1.20 m od kote konačno uređenog i nivelisanog terena oko objekta

- Visina nazidka potkrovnne etaže iznosi najviše 1.20 m računajući od kote poda potkrovnne etaže do tačke preloma krovne kosine.
- U oblikovnom smislu preporučuje se savremen, funkcionalan arhitektonski izraz i materijalizacija. Krovovi objekata mogu biti ravni ili kosi, nagiba do 25o; nije dozvoljeno izvođenje mansardnih krovova.
- u slučaju ograđivanja parcele koristiti laku metalnu i/ili živu ogradu, visine sokla do 50 cm. Nije dozvoljeno izvođenje zidanih ograda.

Pomoćni objekti:

- dozvoljena je izgradnja pomoćnih objekata na svakoj parceli stanovanja malih gustina ukoliko se ispoštuju uslovi u pogledu zauzetosti i kapaciteta i pod uslovom da ne ugrožava uslove korišćenja osnovnog i susjednih stambenih objekata.
- Pomoćnim objektima smatraju se garaže, spremišta i sl. ali i ekonomski objekti kao što su šupe, ljetnje kuhinje, spremišta poljoprivrednih proizvoda i sl.
- Udaljenje pomoćnog objekta od ivice parcele ne smije biti manje od 2.0 m. Rastojanje od granice parcele može biti i manje uz saglasnost vlasnika susjedne parcele, ali ne manja od 1m. Saglasnost ima trajni karakter bez obzira na eventualnu promjenu vlasnika.
- Moguće je graditi pomoćne objekte kao horizontalne dogradnje gabarita osnovnog objekta, pritom poštujući uslove za dogradnju postojećih objekata, kao i opšte uslove stambene izgradnje.

Uslovi za parkiranje vozila na parcelama stanovanja male gustine:

- Potreban broj parking mjesta treba obezbjediti u okviru parcele, na otvorenom, u garaži u sklopu ili van objekta.
- Kod objekata na nagnutom terenu, garaže se mogu graditi u sklopu uređenja dvorišta, u denivelaciji ispred objekta.
- Broj mjesta za parkiranje vozila se određuje po principu 1.1 PM na 1 stan

Pregled planiranih kapaciteta i urbanističkih parametara za svaku urbanističku parcelu:

PARCELA			POSTOJEĆE				
BR UP	NAMJENA	POVRSINA	Povrsina postojecih objekata	BGP postojecih objekata	Broj postojecih objekata	Postojeca zauzetost	Postojeca izgradjenost
UP b244	SMG	697	113	170	1	0.16	0.24

PLANIRANO					
Max. spratnost	Max. zauzetost	Max. izgrađenost	Max. BGP	Max. broj stanova	Max. BGP poslovanja
P+2	0.35	0.88	610	4	244

Uslovi za priključak na saobraćajnu i komunalnu infrastrukturu

Na urbanističku parcelu mora se projektovati i obezbijediti kolski pristup sa gradske saobraćajnice ili javnog puta.

Nesmetan pristup i kretanje licima smanjene pokretljivosti u skladu sa Pravilnikom o bližim uslovima i načinu prilagođavanja objekata za pristup i kretanje lica smanjene pokretljivosti i lica sa invaliditetom br. 05-412/86 od 10/ 2013. Godine, Službeni list Crne Gore, br.48/13 I 44/15.

Planira se parkiranje u okviru svake urbanističke parcele, unutar parcele ili u garaži / ispod objekta u podrumskoj etaži / u skladu sa Pravilnikom o bližem sadržaju i formi planskog dokumenta ,kriterijumima namjene površina, elementima urbanističke regulacije i jedinstvenim grafičkim simbolima ("Službeni list CG", br. 24/10).

Na urbanističku parcelu moraju se obezbijediti komunalni priključci, na vodovodnu, elektroenergetsku i telekomunikacionu mrežu i priključenje na kanalizaciju prema uslovima planiranim ovim planom i uslovima nadležnih javnih preduzeća za oblast infrastrukture.

Uslovi za zaštitu i unapredjenje životne sredine

- u cilju racionalnog korišćenja energije treba iskoristiti sve mogućnosti smanjenja korišćenja energije. Pri izgradnji koristiti savremene termoizolacione materijale, kao bi se smanjila potrošnja toplotne energije;
- predvidjeti mogućnost korišćenja solarne energije;
- kao sistem protiv pretjerane insolacije koristiti održive sisteme (zasjenu škurama, građevinskim elementima, zelenilom i dr.) kako bi se smanjila potrošnja energije za vještačku klimatizaciju;
- drvodredima smanjiti uticaj vjetra i obezbijediti neophodnu zasjenu u ljetnjim mjesecima;
- suspenziju smeća i otpada vršiti u okviru organizacije komunalne djelatnosti.

Mjere energetske efikasnosti

Poboljšanje energetske efikasnosti posebno se odnosi na ugradnju ili primjenu: niskoenergetskih zgrada, unaprijeđenje uređaja za klimatizaciju i pripremu tople vode korišćenjem solarnih panela za zagrijavanje, unaprijeđenje rasvjete upotrebom izvora svjetla sa malom instalisanom snagom (LED), koncepta inteligentnih zgrada (upravljanje potrošnjom energije glavnih potrošača sa centralnog mjesta). Sve nabrojane mogućnosti se u mogu koristiti pri izgradnji objekata na području zahvata.

Za izvedbu objekata uz navedene energetske mjere potrebno je primjenjivati (uz prethodnu pripremu stručnu i zakonodavnu) Direktivu 2002/91/EC Evropskog parlamenta (Directive 2002/91/EC of the European Parliament and of the Council of 16 December 2002 on the energy performance of buildings (Official Journal L 001,04/01/2003)) o energetskim svojstvima zgrada, što podrazumijeva obavezu izdavanja certifikata o energetskim svojstvima zgrade, kome rok valjanosti nije duži od 10 god.

Korišćenje solarnih kolektora se preporučuje kao mogućnost određene uštede u potrošnji električne energije, pri čemu se mora povesti računa da ne budu u koliziji sa karakterističnom tradicionalnom arhitekturom.

Za proizvodnju električne energije pomoću fotonaponskih elemenata, potrebno je uraditi rethodnu sveobuhvatnu analizu tehničkih, ekonomskih i ekoloških parametara.

UREĐENJE TERENA:

Sastavni dio projektne dokumentacije je i projekat uređenja terena za pripadajuću lokaciju. Istim će se definisati svi potrebni sadržaji koji obuhvataju: unutrašnje saobraćajne površine, hortikulturno uređenje sa urbanom opremom i mobilijarom.

Lokaciju nivelisati tako da se pristupnom saobraćajnicom i susjednim parcelama predstavlja prostornu cjelinu, uz uslova da projektovani nagibi riješe pitanje odvodnjavanja površinskih voda prema ulici.

Obradom površina partera izvršiti njegovu diferencijaciju po nemjeni, uz primjenu trajnih, savremenih materijala, i obezbijediti jedinstvo sa prostornim cjelinama objekata u zoni.

Zelenilo individualnih stambenih objekata

Zelenilo u okviru stambenih objekata podrazumijeva uređenje slobodnih površina oko objekta u zavisnosti od orijentacije kuće i njenog položaja na parceli. Osnovna pravila uređenja okućnice su da kuća bude na 1/3 placa, bliže ulici, gdje dobijemo predvrt koji ima estetsku ulogu i sadrži kolski prilaz, parking, rasvjetu i sl. Zadnji vrt služi kao prostor za odmor i ako je parcela veća kao ekonomski dio dvorišta.

Smjernice za pejzažno uređenje i izdavanje UT uslova

- zelene površine treba da zahvataju min. 40% površine parcele;
- min. visina sadnice 2,5-3m;
- min. obim sadnice na visini 1m od 10-15cm;
- kompoziciju vrta stilski uskladiti sa arhitekturom objekta;
- pri odabiru zasada voditi računa o uslovima sredine, dimenzijama, boji, oblicima;

- za izradu staza i stepenica koristiti materijale koji su dostupni u najbližem okruženju;
- predvrt urediti reprezentativno u okviru kojeg razmotriti riješenje formiranja parkinga;
- razdvajanje parcela i izolaciju od saobraćajne buke riješiti podizanjem zasada žive ograde;
- tamo gdje nema mjesta za sadnju drveća i žbunja planirati **vertikalno i krovno zelenilo**, kao isadnju u žardinjerama radi povećanja nivoa ozelenjenosti i što potpunijeg estetskogdoživljaja prostora;
- vertikalno ozelenjavanje sprovesti ozelenjavanjem fasada kuća, terasa, potpornih zidova, u vidu zelenih portala na ulazima u objekat i primjenom pergola;
- na objektima sa ravnim krovom poželjno je planirati krovno ozelenjavanje uz neophodnu pripremu izolacione podloge specifične za ovaj vid ozelenjavanja.

ETAPNOST REALIZACIJE:

Moguća je i fazna realizacija a što je potrebno definisati kroz tehničku dokumentaciju.

OSTALI USLOVI:

1. Proračune za objekat raditi na IX (deveti) stepen seizmičkog intenziteta po MCS skali. Projektom predvidjeti sve potrebne mjere zaštite od požara, kao i druge uslove za zaštitu od elementarnih nepogoda i tehničko-tehnoloških i drugih nesreća, u skladu sa vežećim propisima i od nadležnog organa pribaviti saglasnost na isti.
2. Ukoliko se planira djelatnost koja može imati značajni uticaj na životnu sredinu i zdravlje ljudi, potrebno je projekat uskladiti sa Zakonom o procjeni uticaja na životnu sredinu odnosno pristupiti izradi Elaborata u skladu sa navedenim Zakonom.
3. Potrebno je omogućiti pristup licima smanjene pokretljivosti i licima sa invaliditetom u sve objekte koji svojom funkcijom podrazumijevaju prisustvo građana. Kroz objekte gdje je omogućen rad licima sa invaliditetom neophodno je obezbijediti uslove za njihovo nesmetano kretanje, rad i boravak, u skladu sa važećim zakonskim propisima.
4. Prije izrade tehničke dokumentacije investitor je obavezan, shodno članu 7 Zakona o geološkim istraživanjima („Sl.list RCG", broj 28/93, 27/94 i 26/07) izraditi Projekat o geološkim istraživanjima i obezbijediti Elaborat o rezultatima izvršenih geomehaničkih istraživanja tla za predmetnu lokaciju.
5. Područje Podgorice karakteriše submediteranska klima sa vrlo dugim, toplim i sušnim ljetima, a blagim i kišovitim zimama. Višegodišnjom analizom meteoroloških uslova utvrđeno je da Podgorica ima:
 - srednju godišnju temperatutu od 15,5%^oC (prosječno najhladniji mjesec je januar sa 5%^oC), a najtopliji jul sa 26,7%^oC),
 - 2450 sunčanih sati (102 dana), (najsunčaniji mjesec je juli, a najmanje sunčan mjesec je decembar),
 - srednji godišnji prosjek padavina od 169 mm (najveši u decembru 248 mm, najmanji u julu 42 mm),
 - prosječnu relativnu godišnju vlažnost vazduha 63,6% (max. vlažnost je u novembru 77,2%, a min. u julu 49,4%),

- dominantan sjeverni vjetar sa max. brzinom od 34,80 m/sec (123km/h), sa pritiskom od 75,7 kp/m², najčešće u zimskom periodu sa prosječno 20,8 dana,
- srednji vremenski period u kome je potrebno grijanje je od 10. novembra do 30. marta. Prije projektovanja navedene podatke potrebno je provjeriti i kompletirati od Republičkog hidrometeorološkog zavoda Podgorica.

6. Glavni projekat raditi u skladu sa ovim uslovima, uslovima javnih preduzeća za oblast infrastrukture, važećem Zakonu, vežećim tehničkim propisima, normativima i standardima za projektovanje, izgradnju i korišćenje ove vrste objekata, a na osnovu projektnog zadatka investitora.

INFRASTRUKTURA:

7. Projektovanje elektroenergetskih instalacija i napajanje predmetnog objekta električnom energijom izvesti prema grafičkom prilogu ovih uslova. Električne instalacije projektovati i izvesti u skladu sa vežećim propisima i standardima i na iste pribaviti saglasnost od nadležnog preduzeća. Mjesto i način priključenja objekta na elektroenergetsku mrežu odrediće nakon izrade projektne dokumentacije stručne službe CEDIS-a.

8. Instalacije vodovoda i kanalizacije projektovati u svemu prema važećim propisima i normativima za tu vrstu objekata, a priključiti ih na gradsku distributivnu mrežu prema uslovima d.o.o. "Vodovod i kanalizacija" - Podgorica.

U prilogu se daju trase postojećih i DUP-om planiranih vodova.

Projekat hidrotehničkih instalacija raditi u skladu sa važećim tehničkim propisima i normativima.

9. Priključenje predmetnog objekta na tk mrežu investitor će izvesti prema grafičkom prilogu ovih uslova. Tk instalacije projektovati i izvesti u skladu sa vežećim propisima i standardima i na iste pribaviti saglasnost od nedležnog preduzeća.
